Ethics Approvals for Linguistic Research

In Cooperation with the GRADE Center Language

Trainer

Dr. Merle Weicker
Goethe University, Frankfurt

- Postdoctoral researcher and lecturer at the Institute for Psycholinguistics and Didactics of German
- Specialized in experimental language acquisition research
- Member of the ethics committee at DIPF Leibniz Institute for Research and Information in Education

Objective

- Understand central principles of research ethics for experiments with human subjects
- Know how to adhere to research ethics in linguistic research
- Know the steps of the ethical review process

Description

Empirical data play a major role in linguistic research. If these data are collected by using experimental methods that involve human subjects, researchers must adhere to ethical principles in order to protect the subjects' welfare.
In the first part of this online workshop, participants will be introduced to central principles of research ethics.
In the second part, participants will learn more about the process of receiving an ethics approval for experimental studies in the area of linguistics, including the work of ethic committees and the information and documents necessary for the application of ethical assessment.

Methodology

Trainer input

GRADE Center Language
